ABOUT ME

As a passionate software engineer, I love building robust and scalable components of projects that directly engage with users, creators, and engineers. I enjoy working closely with others and building a culture of learning that encourages individuals to exchange innovative ideas.

SKILLS

Languages: JavaScript, HTML, CSS, Python, SQL, C#.
Technologies: React, Rest APIs, ASP.NET, Git.
Methodologies: Agile, Test-Driven Development, Database Design.
Soft Skills: Leadership, Communication, Problem-solving, Critical Thinking, Empathy, Adaptability.

PROFESSIONAL EXPERIENCE

Department of Defense, Maryland *- Full Stack Engineer*   *June* 2023 - September 2023

- Utilized React and Next JS framework to build an application that could be used as a boilerplate for many other applications to decrease future development time.
- Created a page that allows users to input a file and send it to an S3 bucket to then view and download selected files.
- Developed a login page with authentication that pulls data from a user database to allow or deny access to the application.
- Wrote models and created database tables using Prisma and PostgreSQL, created scripts to seed the database.
- Developed APIs to push and pull data to and from the database.
- Collaborated on GitHub with other coworkers to bring code together and communicated tasks well when paired programming.

C & C Pressure Washing, Dallas OR *- Owner*   January 2022 – January 2024

- Vastly enhanced problem-solving and communication skills with customers.
- Enhanced collaborative aptitude through engagement with a business partner.

EDUCATION

Western Oregon University, Monmouth OR
Bachelor of Computer Science   Expected July 2024

- 3.74 Computer Science GPA
